Purpose of Contact: B123 Slab Concrete Recycling

Discussion

David Kruchek was faxed the TCLP and total metal results for the five locations that he had requested on the 123 Slab on January 28, 2002. In a voicemail sent to Dyan Foss, Mr. Kruchek indicated that he concurred with the Site's assessment that neither the TCLP nor the total metal results exceeded the levels of concern and the material was acceptable for recycling. There is still an outstanding issue regarding the sump Room 157; David Kruchek has not concurred on the acceptability of recycling this material. Additional discussions will be held to determine his reasons for this.
